

# Preliminary Amendment

## PRELIMINARY AMENDMENT

**Application No.:** 19/756,145 **Filed:** July 28, 2026 **Title:** AI-Powered Course Knowledge Base Generation and Adaptive Learning Framework, with Structural Relationship Graph Generation, Conversational Brief Elicitation, Hybrid Semantic Search, and Interactive Mastery-Aware Knowledge Graph Navigation  
**Applicant/Inventor:** Charles Ray Irvine

This Preliminary Amendment is filed prior to the first Office Action.

### **Amendment to the Specification**

A substitute specification is submitted herewith pursuant to 37 CFR 1.121(b)(3), replacing the specification as originally filed.

The substitute specification corrects paragraph and list formatting only. In the specification as originally filed, several enumerated lists — in the Background of the Invention, and in the Detailed Description at the Population Method of Invention 1, the Core Logic of Invention 3, and the Core Logic of Invention 5 — were rendered without paragraph breaks between list items due to a document-conversion error, causing list items to run together as a single paragraph. No words have been added to, deleted from, or otherwise altered in the specification. No new matter is introduced by this amendment. A marked-up version showing insertions/deletions is not submitted because the correction consists solely of paragraph-break insertions between existing, unchanged text, for which word-level markup is not applicable; see 37 CFR 1.121(b)(3).

### **Claims**

The claims are unchanged from those originally filed. No amendment to the claims is made.

**Conclusion**

Applicant respectfully requests entry of this amendment. No fee is believed to be due in connection with this Preliminary Amendment.

Respectfully submitted,

/Charles Ray Irvine/ Charles Ray Irvine Pro se Applicant/Inventor 5309 NW 60th  
Terrace, Kansas City, MO 64151 Date: [confirm current date before filing]
